

```
function burgerReducer(state, action) {  
  switch (action.type) {  
    case '[Menu Page] Add Menu Item': {  
      if (action.kind !== 'burger') {  
        return state;  
      }  
  
      return [...state, action.item];  
    }  
  }  
}
```

**Avoid nested conditionals in reducers and effects**
