```typescript
@Component({
  selector: 'bc-book-preview',
  template: `
    <mat-card>
      <mat-card-title-group>
        <mat-card-title>{{ book.title }}</mat-card-title>
      </mat-card-title-group>
      <mat-card-content>
        <p *ngIf="description">{{ book.description }}</p>
      </mat-card-content>
    </mat-card>
  `,
})
export class BookPreviewComponent {
  @Input() book: Book;
}
```

COMPONENT PURITY

```typescript
@Component({
  selector: 'bc-book-preview',
  template: `
    <mat-card>
      <mat-card-title-group>
        <mat-card-title>{{ book.title }}</mat-card-title>
      </mat-card-title-group>
      <mat-card-content>
        <p *ngIf="description">{{ book.description }}</p>
      </mat-card-content>
    </mat-card>
  `,
})
export class BookPreviewComponent {
  @Input() book: Book;
}
```
