```javascript
import { cold, getTestScheduler } from 'jasmine-marbles';

const messages$ = cold('---a--b--|', {
  a: 'Hello',
  b: 'World',
});

messages$.subscribe(message => console.log(message));

getTestScheduler().flush();
```

Schedulers perform tasks on a schedule

```
import { cold, getTestScheduler } from 'jasmine-marbles';

const messages$ = cold('---a--b--|', {
  a: 'Hello',
  b: 'World',
});

messages$.subscribe(message => console.log(message));

getTestScheduler().flush();
```
