```javascript
import { interval, animationFrameScheduler } from 'rxjs';

interval(17, animationFrameScheduler).subscribe(i => console.log(i));
```

```
import { interval } from 'rxjs';

interval(17).subscribe(i => console.log(i));
```

Marble testing uses virtual time

```
import { interval, animationFrameScheduler } from 'rxjs';

interval(17, animationFrameScheduler).subscribe(i => console.log(i));
```
