```
function burgerReducer(state, action) {
  switch (action.type) {
    case '[Menu Page] Add Menu Item': {
      if (action.kind !== 'burger') {
        return state;
      }

      return [...state, action.item];
    }
  }
}
```

```javascript
function burgerReducer(state, action) {
  switch (action.type) {
    case '[Menu Page] Add Burger':
      return [...state, action.item];
  }
}
```

```
class BurgerApiEffects {
  @Effect() addBurger$ = this.actions$
    .ofType('[Menu Page] Add Menu Item')
    .pipe(
      filter(action => action.kind === 'burger'),
    )
}
```

```
function burgerReducer(state, action) {
  switch (action.type) {
    case '[Menu Page] Add Burger':
      return [...state, action.item];
  }
}
```
